SURENDRA KAMBLE

AWS CLOUD & DEVOPS ENGINEER

+91 84460 54384 | surendrakamble55184@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

Computer Engineering graduate with hands-on experience in **AWS Cloud, DevOps, CI/CD, production support, monitoring,** and infrastructure automation. Skilled in **AWS, Linux, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, ArgoCD,** and observability tools including **Prometheus, Grafana, and CloudWatch**. Experienced in cloud deployments, system troubleshooting, device/network integration, and reliable production support.

TECHNICAL EXPERTISE

Cloud	AWS (EC2, S3, IAM, VPC, EKS, RDS, Lambda, ALB, CloudWatch)
DevOps / CI/CD	Jenkins, GitHub Actions, Git, GitHub, ArgoCD, AWS CodePipeline, GitOps
Containers	Docker, Docker Compose, Kubernetes, EKS, Minikube
IaC / Automation	Terraform, AWS CloudFormation, Ansible, Bash, Python
Monitoring	Prometheus, Grafana, CloudWatch, Linux
AI Tools	GitHub Copilot, ChatGPT, Perplexity

PROFESSIONAL EXPERIENCE

Zygal | Deekshaa Infosystems Private Limited 2026 – Present
Technical / System Support Engineer

- Configure, integrate, and validate CCTV cameras, NVRs, TAM devices, Jio Tags, asset trackers, electronic control panels, and Panic, Fire, Smoke, Vibration, and PIR sensors during site commissioning.
- Troubleshoot device and network connectivity issues while providing remote system administration, Face Recognition validation, access assignment, and end-to-end alert verification.
- Coordinate with site engineers and internal teams to resolve site-level issues, validate system functionality, and maintain deployment and configuration documentation.

Fortune Cloud Technologies Private Limited 2025 – 2026
AWS DevOps & Cloud Intern

- Designed and maintained AWS infrastructure using EC2, S3, RDS, Lambda, ALB, NLB, Security Groups, and VPC networking, including MySQL/PostgreSQL RDS backup, monitoring, and optimization.
- Deployed and managed containerized workloads using Docker and Kubernetes across Amazon EKS and self-managed clusters.
- Automated infrastructure provisioning with Terraform and AWS CloudFormation and built CI/CD pipelines using Jenkins, GitHub Actions, and AWS CodePipeline.

PROJECTS

End-to-End GitOps Deployment on AWS EKS GitHub
AWS EKS • Jenkins • ArgoCD • Terraform • Docker • Kubernetes • Prometheus • Grafana

- Automated CI/CD using Jenkins, ArgoCD, and Terraform to deploy a three-tier application on AWS EKS using GitOps-based delivery, reducing manual intervention by **80%**.
- Implemented Prometheus and Grafana monitoring to improve visibility, reliability, and operational management of Kubernetes workloads.

Wisecow – Secure Kubernetes CI/CD Pipeline GitHub
Docker • Kubernetes • GitHub Actions • Ingress • TLS/HTTPS • DevSecOps

- Built a GitHub Actions CI/CD pipeline with vulnerability scanning to build and publish Docker images and deploy applications to Kubernetes through Ingress with TLS/HTTPS.
- Applied DevSecOps practices using RBAC, NetworkPolicies, and Kubernetes Secrets with monitoring for cluster visibility.

EDUCATION

Bachelor of Engineering – Computer Engineering 2022 – 2026
Jaihind College of Engineering, Pune | SPPU **CGPA: 8.01/10**

Higher Secondary Certificate – Science 2020 – 2022
Navmaharashtra Mahavidyalaya Junior College, Pune

CERTIFICATION

AWS Cloud Practitioner Essentials Certificate
